Patent Application Of: Biggs et al.

For: One Piece Header Assembly For An Implantable Medical Device

the specification of which is being transmitted herewith.

Commissioner of Patents
Washington, D.C. 20231

INFORMATION DISCLOSURE STATEMENT
Pursuant to 37 CFR 1.56

1. Applicants submit herewith patents, publications or other information of which they are aware, which they believe may be material to the examination of this application and in respect of which there may be a duty to disclose in accordance with 37 CFR 1.56.

The filing of this Information Disclosure Statement (IDS) shall not be construed as a representation that a search has been made (37 CFR 1.56(g)), an admission that the information cited is, or is considered to be material to patentability or that no other material information exists.

IDS For: One Piece Header Assembly For An Implantable
Medical Device
Inventor: Biggs et al.

The filing of this IDS shall not be construed as an admission against interest in any manner (Notice of Jan. 9, 1992, 1135 O.G. 13-25, at 25).

2. Attached is Form PTO-1449. Legible copies of all items listed accompany this IDS.

3. A concise explanation of the possible relevance of the listed information items is as follows:

U.S. Patent No. 4,254,775 to Langler shows an implantable defibrillator with a multi-component lid which is configured to mate with the device case and also carries insulated feed-throughs.

U.S. Patent No. 4,471,783 to Buffet describes a cardiac stimulator. A fluid-tight "cell" 12 containing one or more electronic circuits 13 and output terminals closes the open end of a case 2 containing a current generating means. Welding is used to seal the cell 12 to the case 2. Then, the free space left between the fluid-tight cell 12 and the case 2 is filled with electrolyte.

U.S. Patent No. 65,643,328 to Cooke et al. describes an implantable medical device including a header for closing the device case 12. The header is provided with sockets. The disclosure at column 4, lines 1 through 13, describes a casting process for the header using epoxy.

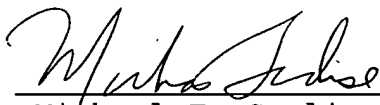

IDS For: One Piece Header Assembly For An Implantable
Medical Device
Inventor: Biggs et al.

U.S. Patent 5,282,841 to Szyszkowski describes an electrical connector comprised of feedthrough terminals and connector blocks used in an implantable medical device encased in a block of insulated epoxy or similar material.

4. The remaining patents on the attached Form PTO 1449 were located during a patentability search.

5. The person making this statement is the agent who signs below, who makes this statement on the information supplied by the inventors and the information in the agent's file.

Respectfully Submitted,

By: 
Michael F. Scalise
